City & Guilds Level 2 Technical Certificate in Electrical Installation

Dear Salim,

The IET is one of the world's largest engineering institutions with over 167,000 members in 127 countries. It is also the most multidisciplinary – to reflect the increasingly diverse nature of engineering in the 21st century. As the leading institution within the electrotechnical sector, the IET supports this qualification for young people to progress into the electrotechnical industry.

The IET has worked with City & Guilds as part of its development process, to scope out the proposed qualification. The IET is satisfied that the content meets both the Institution's needs as a leading professional body in this sector and those of the people taking it who are preparing for a career within the electrotechnical industry.

The City and Guilds Level 2 Technical Certificate in Electrical Installation allows learners to gain the essential skills and knowledge to progress onto an apprenticeship programme at level 3. This route at Level 2 is a step towards becoming a competent electrician.

We believe the following practical skills and knowledge will enable learners to progress onto further learning within the Electrotechnical sector.

Skills and knowledge include:

- Health and safety and industry practices
- Electrical science
- Electrical installation
- Electrical technology

The IET grants permission to City and Guilds using its name (and logo) on the DfE and City and Guilds websites.

Yours sincerely

Richard Townsend
Senior Engineer
